

THE D|13 SINK SYSTEM CREATES A FIVE-STAR RESTROOM EXPERIENCE FOR BEAN RESTAURANT GROUP

The D|13 Sink System is creating an amazing restroom experience at two of the Bean Restaurant Group's most popular locations—and they're just getting started.

"The consumer loves it," says Andy Yee, Principal Managing Partner of the Bean Restaurant Group. "They come out saying, 'I really like your bathrooms.'"

"IT WAS GREAT WORKING WITH THE D|13 TEAM. THEY MADE IT EFFORTLESS FOR US—FROM THE CONCEPTUAL DRAWINGS TO THE FINISHED PRODUCT AND INSTALLATION. I CAN'T WAIT TO PUT THE NEXT ONE IN."

FROM CLASSIC GERMAN TO ASIAN FUSION

The Bean Restaurant Group's first D|13 Sink System installation was at the legendary Student Prince, a landmark German restaurant founded in 1935.

It was so successful there that they installed the D|13 Sink System at Iya Sushi and Noodle Kitchen, their popular Asian fusion restaurant.

The fact that the D|13 Sink System blends with the aesthetics of both classic and modern restaurant environments is testament to its customization options, ease of installation and ability to serve the unique visions of architects and designers.

FORM AND FUNCTION

The D|13 Sink System is the most advanced integrated sink system on the market, providing the most hygienic, sustainable and cost-effective way to wash and dry hands.

It offers a 95% cost savings versus paper towels, eliminating their labor, maintenance and waste while creating a more hygienic restroom environment.

In addition to state-of-the-art features including adjustable speed and heat, LED illumination and a Sound Suppression Air Delivery System, the D|13 Sink System comes fully equipped with a HEPA Filtration System proven to remove 99.999% of viruses¹ and 99.97% of potentially present bacteria at 0.3 microns² from the airstream.

"It's a good blend into our industry," Andy Yee says. "It's all touchless—soap, wash, dry. You eliminate the c-fold towels. There's no trash around the bathrooms anymore."

"THE CONSUMER LOVES IT. THEY COME OUT SAYING, 'I REALLY LIKE YOUR BATHROOMS.'"

REVERSE AIRFLOW. FORWARD THINKING.

In addition to the sleek design and intuitive user experience, what really sets the D|13 Sink System apart is the XLERATORsync® Hand Dryer.

Designed in collaboration with Excel Dryer and a world-renowned design firm, the dryer's "reverse airflow" design blows air/water flow away from the user, promoting hygiene and enhancing the user experience.

"I thought the dryer might be blowing water onto my floors," Andy Yee says. "Then the yellow signs come up: Slippery When Wet. We don't have that problem with the sink system."

*"IT'S A GOOD BLEND INTO OUR INDUSTRY.
IT'S ALL TOUCHLESS—SOAP, WASH, DRY.
YOU ELIMINATE THE C-FOLD TOWELS.
THERE'S NO TRASH AROUND THE
BATHROOMS ANYMORE."*
