The D|13 Sink System, Featuring The XLERATORsync® Hand Dryer

The D|13 Sink System featuring the XLERATORsync Hand Dryer by Excel Dryer is the future of commercial restrooms and the most hygienic, sustainable and cost-effective way to wash and dry hands. A masterpiece of form and function, the system seamlessly fuses no-touch, high efficiency fixtures on the sink deck allowing you to wash and dry hands all in one place, providing the ultimate user experience. The customizable sink design options allow architects and designers to completely transform the aesthetic of any restroom.

WHERE DOES THE WATER GO?

The hand dryer redirects airflow, blowing water from hands away from the user and into the sink basin toward the drain.

IS IT HYGIENIC?

High-efficiency, touch-free fixtures reduce touch points—promoting superior hygienic standards. The hand dryer's HEPA Filtration System has been proven to remove 99.999% of viruses[1] and 99.97% of potentially present bacteria[2] at 0.3 microns from the airstream.

HOW DOES IT LOOK?

The hand dryer fixture is intricately crafted for superior performance with an agnostic design that complements other high-end fixtures and surroundings. Available in a variety of finishes, this provides a significant improvement to the dryer aesthetic.

HOW DOES IT SOUND?

The XLERATORsync Hand Dryer has a patent-pending adjustable sound suppression air delivery system making it the quietest high-efficiency hand dryer on the market.

SINK. TO A NEW LEVEL.

COUNTER AND SINK

Offers designers flexibility in the choice of color, shape, dimensions, and material. In addition to:

- Wide array of material choices for the sink basin, countertop, and base cabinet, including but not limited to solid surface quartz and stone
- Variety of supplemental options such as baby changing units, built-in trash receptacles, and countertop elevations

HAND DRYER

The beautifully-sculpted XLERATORsync Hand Dryer fixture fuses state-of-the-art innovation with high-end aesthetics. A collaboration between Excel Dryer and a world-renowned design firm, it combines the benefits of the high-speed, energy-efficient XLERATOR® with the elevated user experience and hygienic efficiency of being sink deck-mounted next to the faucet. This new system solves the main issues of aesthetics, sound levels, water control and hygiene associated with traditional wall mounted dryers.

FAUCET AND SOAP DISPENSER

Provides the flexibility to utilize nearly any soap and faucet combination from several top brands:

- Use non-proprietary soap from the manufacturer of your choice
- Select a faucet with the flow rate and shape that complements your décor
- Choose fixture shapes that match, are complementary in design, or completely different from one another

INSTALLATION

Designed for simple, accurate installation:

- Counter and cabinet components arrive partially assembled
- Includes template with optimum locations for electrical boxes, drains and water supply
- Brackets are pre-drilled to provide maximum accuracy and ease in installation
